

# Flanchford Bridge

## Stakeholder Update – 05 May 2016

### Design

In response to the Leigh Parish Council concerns, options are being developed to minimise the risk of vehicles mounting the footway, and to change the visual perception for drivers approaching the bridge. It is hoped a visualisation drawing of the approach view to the bridge can be created to inform the best option. These will be passed on to Leigh Parish for comment once completed. In addition to this, a Safety Audit is being carried out of the highway aspects of the bridge works to also inform the options to address the concerns of the local community. These elements are not critical to works commencing and will be progressed during the early stages of construction.

### Programme

The works will begin on site on Monday 16<sup>th</sup> May 2016 with a 6 month programme to complete. The road will be closed to all forms of traffic including pedestrians, cyclists and horse riders from this date. A letter drop has been carried out to notify nearby residents and businesses about the works. There is also information on the Surrey web page about the scheme, and this will show work progress. Some lightweight advanced warning signs have been displayed at the bridge informing users of the road about the works dates. Permanent signs are being installed this week along with two electronic message boards on the A25 and A217.

### Diversion

The signed diversion route will be via Flanchford Road, Tapners Road, Smalls Hill Road, Dean Oak Lane, Ironsbottom, Dovers Green Road, Prices Lane, Slipshatch Road, Clayhall Lane and Flanchford Road or this route in reverse order. Signs will be placed on the approaches from both the A25 and the A217 that there is no access to each road via Flanchford Road. During the first two weeks during the daytime, there will be operatives at both ends of the closure to advise drivers.

### Communications

The Surrey CC and Local Committee websites, for Mole Valley and Reigate and Banstead, and [www.roadworks.org](http://www.roadworks.org) will be updated during the works. In addition, a monthly progress report will be compiled and sent to all stakeholders.
